

Subspace.money Product Teardown

Product Intern Assignment

Prepared By:

Gunde Bhargavi

METHODOLOGY

- Explored website and user dashboard
- Tested subscription discovery and sharing flows
- Analyzed wallet, events, marketplace and support features
- Reviewed customer feedback and refund policies
- Benchmarked against Splitwise

QUICK SWOT

Strengths	Weaknesses
Unique subscription-sharing marketplace	Unique subscription-sharing marketplace
Multiple savings opportunities	Trust - buliding can be stronger
Seller ecosystem	Feature overload for new users

Feedback 1 (GTM & ICP)

Observed

The homepage exposes multiple offerings simultaneously:

- Subscription management
- Bill payments
- Wallet
- Events
- Chat
- Marketplace

Compared to **Splitwise**, which immediately communicates its purpose as an expense-sharing platform, Subspace requires users to explore multiple sections before understanding its primary value proposition.

Problem

- New users may struggle to identify the platform's core use case, increasing cognitive load and reducing activation.

Ship Instead

- Lead with a clearer primary message:
- Share subscriptions and save money.
- Position wallet, events and marketplace as secondary capabilities.

Priority

- High Impact / Medium Effort

Feedback 2 (UX)

Add Subscription ×

 **Netflix** **₹ 499**
Standard Plan per month
2 accounts sharing

Plan

Standard Plan - ₹499 ▾

Expiry Date

May 31, 2026 📅

Make Public ☒
Making your subscription public allows others to see and join your group.

+ Add to Track

Observed

During subscription joining and tracking flows, information such as:

- Savings breakdown
- Sharing mechanics
- Group rules
- Exit process

is not clearly explained before joining.

While reviewing Netflix and YouTube subscription pages, several questions remained unanswered.

Problem

Subscription sharing depends heavily on trust and transparency.

Users may hesitate to join groups without understanding how the system works.

Ship Instead

Introduce a "How Sharing Works" section explaining:

- Payment splitting
- Access sharing
- Member limits
- Group owner responsibilities
- Exit policy

Priority

High Impact / Low Effort

Feedback 3 (Features / Services)

Observed

Play Store reviews frequently mention:

- Transactions stuck in processing
- Refund concerns
- Delayed issue resolution

Support exists, but live support operates only during business hours.

Problem

Financial products require immediate reassurance when payments fail.

Trust can deteriorate quickly when users feel unsupported.

Ship Instead

Introduce:

- 24/7 AI support assistant
- Refund status tracker
- Real-time transaction updates

while escalating complex issues to human agents.

Priority

High Impact / Medium Effort

Feedback 4 (Competitor Analysis)

Observed

Splitwise clearly communicates:

- Split expenses with friends and family
- within seconds of landing on the homepage.
- Subspace offers a broader ecosystem but requires significantly more exploration before users understand the value proposition.

Problem

Broader offerings increase complexity and dilute first-time user understanding.

Ship Instead

Create segmented onboarding:

- Subscription Savers
- Families
- Students
- Shared Household Users

Personalize onboarding based on intent.

Priority

Medium Impact / Medium Effort

Feedback 5 (Potential Collaborations)

Observed

Subspace already features services such as:

- Netflix
- YouTube Premium
- Swiggy One
- Amazon Prime

However, discovery primarily occurs within the Subspace platform..

Problem

User acquisition depends on customers proactively searching for savings opportunities.

Ship Instead

Partner with subscription providers and student communities.

Examples:

- Spotify Student
- Netflix
- YouTube Premium
- College ambassador programs

Display:

Save up to X% by sharing through Subspace

at the point of subscription purchase.

Priority

High Impact / High Effort

Prioritization Matrix

Feedback	Impact	Effort
Positioning Clarity	High	Medium
Sharing Transparency	High	Low
Support & Refund Trust	High	Medium
Segmented Onboarding	Medium	Medium
Partnerships	High	High

Thank You....
